3 Keys to Success

- **Know your audience**

- Accessibility

- Credibility

Our Development Approach: Iterative

- Initial planning stage: Create a workout at the click of a button
- Assign tasks, work, reconvene, and plan based on results
- Good for flexible schedules
  - Step By Step, no exact timeline
- Allowed for constant communication
- New ideas/design wasn't a hassle

Tools

Git w/ Github (version control)...

Asana (general management)...

Slack (communication)...

MongoDB (database)...

Python unittest (testing tool)...

Google Cloud Platform (deployment)...

Flask(web framework tool)

Tools

Git w/ Github (version control)… (★★★★☆)

Asana (general management)… (☆☆☆☆☆)

Slack (communication)… (★★★★☆)

MongoDB (database)… (★★★★★)

Python unittest (testing tool)… (★★★☆☆)

Google Cloud Platform (deployment)… (★★★★☆)

Flask(web framework tool) (★★★★★)

Our Challenges...

- Git :)
- No experience in html/server/clientside programming for many members
- Deciding what tools we wanted to use(primarily web framework)

Our Successes!

- Learned a ton about full stack, from db to front end
- Delivered a functioning website -- hosted at
  http://35.225.185.81/
- Good communication between teammates
- Future projects and how to plan them

Now for the Demo!
